

MicroPath Infinity USB cable

By John Norton

July 2021

Hi Paul

MicroPath Infinity USB cable arrived first thing this morning so plugged it in, gave it a cursory listen just to make sure all is well then headed off to work. I very much like how the cable is presented, really nice touch and the cable looks great too.

Have just sat down now with headphones on and the first thing that struck me is how robust it sounds and the beautifully extended highs. Really looking forward to putting it through it's paces, will keep you posted.

.....

Thanks Paul, I can already hear it's an excellent cable, huge soundstage, fab bass, warmth, oodles of fine detail but the one that got me is the startling dynamics. This along with intimate vocals makes for a realistic listening experience.

It's not even 24 hours gone yet so I don't want to get too far ahead of myself but to me it sounds levels above the Callisto and that really is something at this price point!

Watch this space.....

.....

The cable now had around 425 hours on it and it is simply fantastic and I wish to purchase. The FTA Callisto is already up for sale! In my opinion it is top of the class at it's price point and probably a lot better than cables far pricier.

.....

I can't sing it's praises enough, it does things in a very special way getting you to the heart of the music message. Depth, width, height and layering are amazing, and every sound has correct weight and all the extra fine detail that emerges, sounds that weren't even hinted at before in some tracks. God only knows how good your Ref cable is!

Pat yourself on the back Paul.
